

Game Level Dataset

About This Dataset

This dataset contains information from every regular season home game during the 2023-2024 and 2024-2025 seasons. The information contained within this dataset is the item given away to fans on each gameday, or if none was given.

Data Information

This dataset contains 82 rows with 2 columns. Here is more information about the datatypes:

Game object
Giveaway object
dtype: object

Dataset Statistics

Due to the categorical nature of the data, no regular summary statistics can be generated. However, the data does show that out of the 82 regular season games played, 19 had some form of giveaway, totaling to 23.17% of games.

Sensitivity

None of the data within the dataset is considered to be confidential. It was freely provided to any active participants of the 2025 Bucks Hackathon event.
